

Robin Rietdijk

Software Engineer

robin@rjrietdijk.com · (+31) 6 1429 6237 · Delft, Netherlands · rjrietdijk.com

SUMMARY

Computer Science & Engineering graduate from TU Delft. Built DELPHI, an AI-driven interactive installation exhibited at ThingsCon 2023 and Highlight Delft 2024, as lead developer and team leader. Bachelor's thesis applied SMT solvers to constraint-based logic puzzles. Looking for a software engineering role where I can work on technically challenging problems end-to-end.

PROJECTS

DELPHI - AI-powered Interactive Installation

Oct 2023 - Feb 2024

Interactive Environment minor - Delft University of Technology

- Led a team of 5 as lead developer and team leader, building an AI-driven installation where users manipulated sensor-equipped colour orbs to control room lighting and generate personalised poems via the ChatGPT API.
- Built a Node.js backend functioning as an MQTT broker, programmed microcontrollers in CircuitPython to handle hardware I/O.
- Exhibited at ThingsCon 2023 and selected for Highlight Delft 2024 among AI-themed installations.

Bachelor's Thesis - Solving Hitori Puzzles using SMT

2025 - 2026

Delft University of Technology - Grade: 7.5

- Researched and evaluated Satisfiability Modulo Theories (SMT) approaches for modelling and solving Hitori puzzles.
- Implemented solver pipelines in Python, comparing constraint formulations for correctness and performance.

WORK EXPERIENCE

Teaching Assistant

Apr 2024 - Jul 2024

Delft University of Technology - Industrial Design Faculty

- Supported students in designing and building embedded systems using a CircuitPython-based prototyping kit.
- Resolved hardware and software issues hands-on during lab sessions.

General Employee

2012 - 2020

Prominent Tomatoes

- Carried out a range of practical tasks at a large-scale greenhouse horticulture operation.

EDUCATION

BSc Computer Science & Engineering

2017 - 2026

Delft University of Technology

- Minor: Interactive Environments (Industrial Design Engineering): embedded systems, physical computing, human-computer interaction.

ISW Hoogeland - VWO

2011 - 2017

Profile: Natuur & Techniek

EXTRACURRICULAR ACTIVITIES

Various board & committee roles

2020 - 2026

Delftsche Studenten Bond

- Treasurer, OWee committee (2020-2021): managed committee finances and built web platforms in JavaScript for student introduction week activities, used by incoming students to explore the association.
- Treasurer, Almanak committee (2022-2023): designed and produced the annual Almanak using Adobe InDesign and Illustrator.
- Audit committee (2021-2026): reviewed and verified association financial documents.

Secretary, board member

Apr 2021 - Nov 2025

Stichting Eettafel Tyché

- Supported board-level decision making, recorded minutes, and managed association operations.

SKILLS

Proficient: Python, Java, JavaScript (Vue.js, Node.js), HTML/CSS, CircuitPython, MQTT

Familiar with: C, C++, Z3/SMT solvers

Tools: Git, Docker, Nginx, Adobe InDesign & Illustrator, Microsoft Excel

Languages: Dutch (native), English (fluent)
